

A collage of industrial and construction equipment, including a large yellow excavator, a blue crane, a red and white lighthouse, a black and white control panel, and various smaller tools and components, set against a blue background.

- Consistent quality
- Technical innovation
- Premier customer service

Parker's technical resources provide the correct filtration technologies that conform to your requirements. That's why thousands of manufacturers and equipment users around the world rely on Parker Filtration products and people.

Worldwide Sales and Service

Parker Filtration's global reputation as a reliable supplier of superior filtration products is the result of a focused and integrated development and manufacturing system.

Parker Filtration consolidates quality filtration products, manufactured by process filtration, air and gas filtration and separation, fuel conditioning and filtration, hydraulic and lubrication filtration, fluid power products and fluid condition monitoring equipment into one broad-based range that covers many markets and most applications, as detailed here.

Hydraulic, Lubrication & Coolant Filtration

High-performance filtration systems for production machinery in industrial, mobile and military/marine applications.

Compressed Air & Gas Filtration

Complete line of compressed air/gas filtration products; coalescing, particulate and adsorption filters in many applications in many industries.

Process & Chemical Fluid Filtration

Liquid filtration systems for beverage, chemical and food processing; cosmetic, paint, water treatment; photo-processing; and micro-chip fabrication.

Racor Fuel Conditioning & Filtration

Parker air, fuel and oil filtration systems provide quality protection for engines operating in any environment, anywhere in the world.

System Contamination Monitoring

On-line dynamic particle analysis, off-line bottle sampling and fluid analysis and measurement of water content polluting the oil in a system. All important and achievable, cost-effective solutions available to equipment manufacturers and end users alike.

Service and Recalibration for your Parker Condition Monitoring Product

With ever growing competition for on-line particle counting, one of the major selling points of the Laser CM20 and other peripherals is the option of a dedicated Service Centre in the Country of sale, offering full service and re-calibration.

Ask anyone in places such as Norway, America, Brazil, India, Singapore and Japan, not to mention France and most recently Dubai and they will all tell you of many occasions where a sale has swung their way because they have had fully trained engineers, who speak their language and can help in technical matters quickly and confidently.

Obviously, we still have many parts of the world, not covered by these Service Centre's, which is why we have our own service department at the CMC, dealing with all UK and worldwide users.

Contents of this booklet:

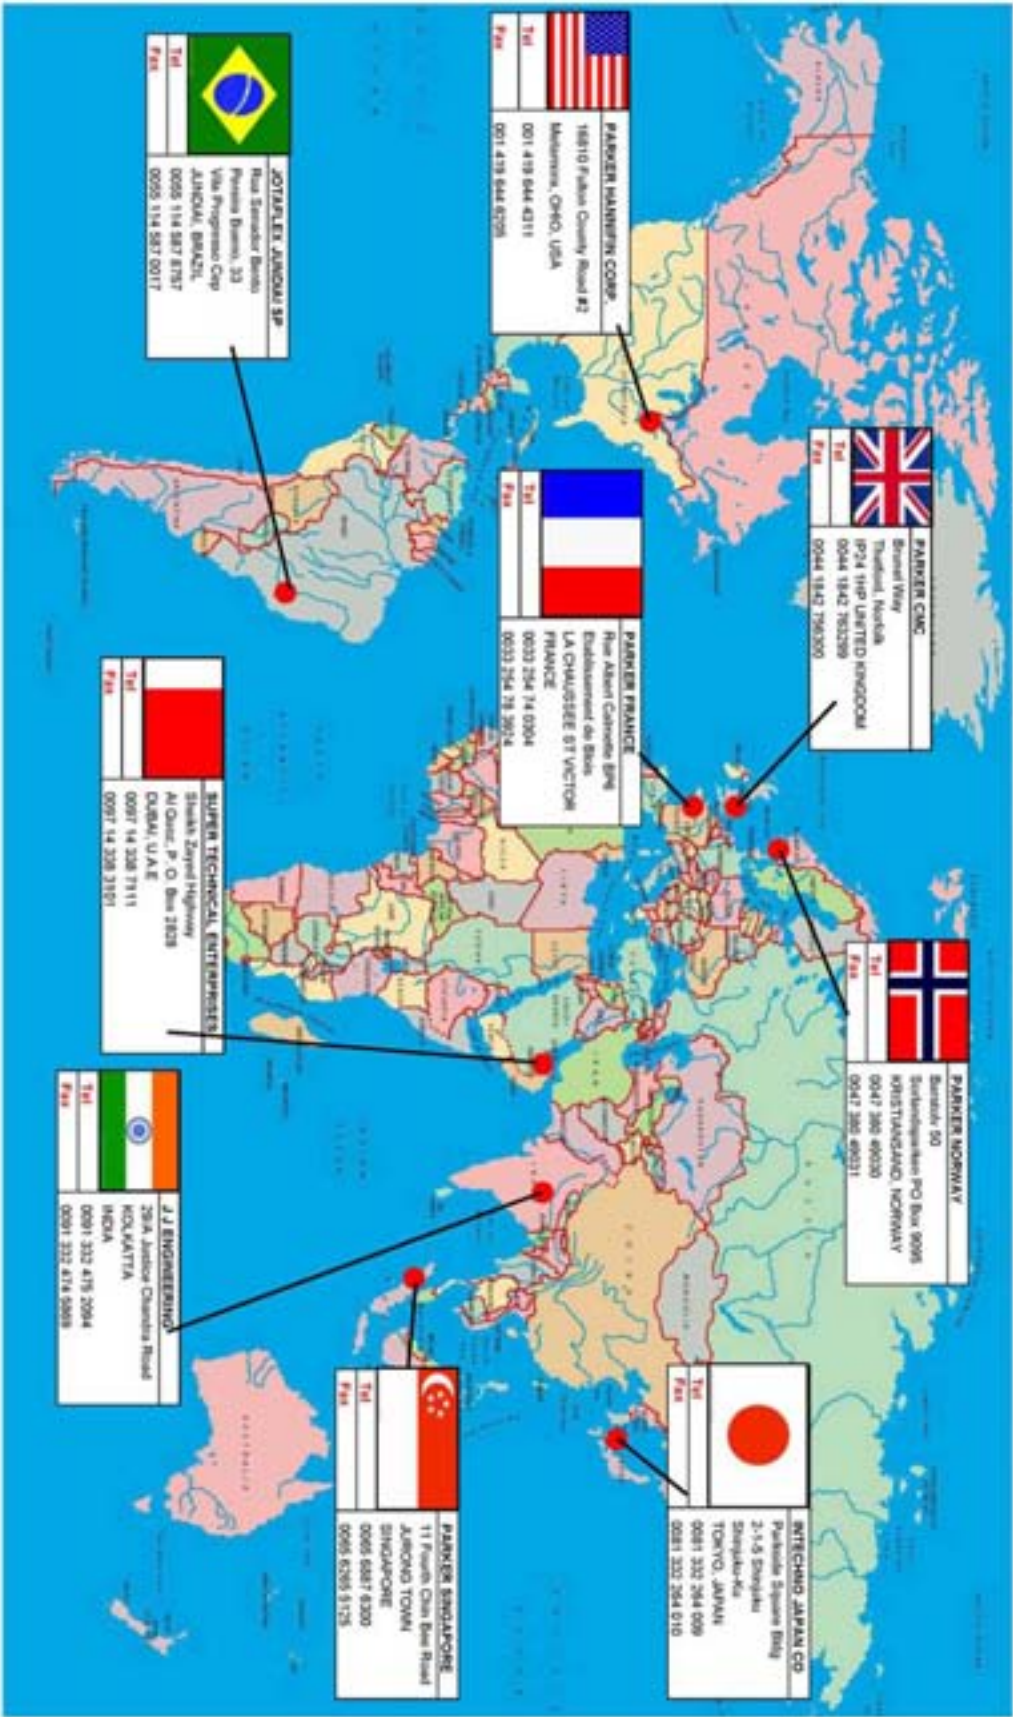

- Parker Hannifin service locations
- Service centre's around the world
- Certificates
 - Certificate of registration – ISO 9001
 - Warranty and limitation of liability
 - Calibration certificate
 - Certificate of conformity (only if requested at point of order)
- Notes Page

Parker Sales Companies

Please be aware items purchased should no longer be returned to the UK directly for servicing, please contact your local Parker Sales Companies, for all future returns.

Certificates

Following are the certificates for your Parker condition monitoring product.

- Certificate of registration
- Warranty and limitation of liability
- Calibration certificate
- Certificate of conformity

These certificates have been authenticated and added to this booklet to be shipped with your order.

Please note: You will only receive a certificate of conformity if you have requested this item at the point of order.

All brochures should contain a calibration certificate. If you do not receive a calibration in this brochure please contact the Condition Monitoring Centre.

WARRANTY AND LIMITATION OF LIABILITY

Parker warrants that products, parts or materials manufactured by it will be of good materials and workmanship and that reasonable care will be employed in assembling or incorporating items not manufactured by it.

Parker will also perform services so that upon the Buyer giving written notice to the Company that Goods have not been supplied or services performed as aforesaid, will at its own expense at its option, replace or repair such defective goods or remedy such defaults in service.

The warranty obligation shall not apply where the Goods have been

- a. Tampered with
- b. Improperly altered
- c. Repaired or maintained without prior consent from Parker
- d. Installed or connected incorrectly, or
- e. Subjected to Misuse

In each case, other than as a result of the Parker's own acts or omissions, the Buyer shall at its own cost return the Goods to the Company for inspection and or repair.

The above warranty shall apply in respect of matters whereof the Buyer gives written notice within 13 months of delivery (15 months outside of Europe) after which any claim in respect thereof shall be absolutely barred.

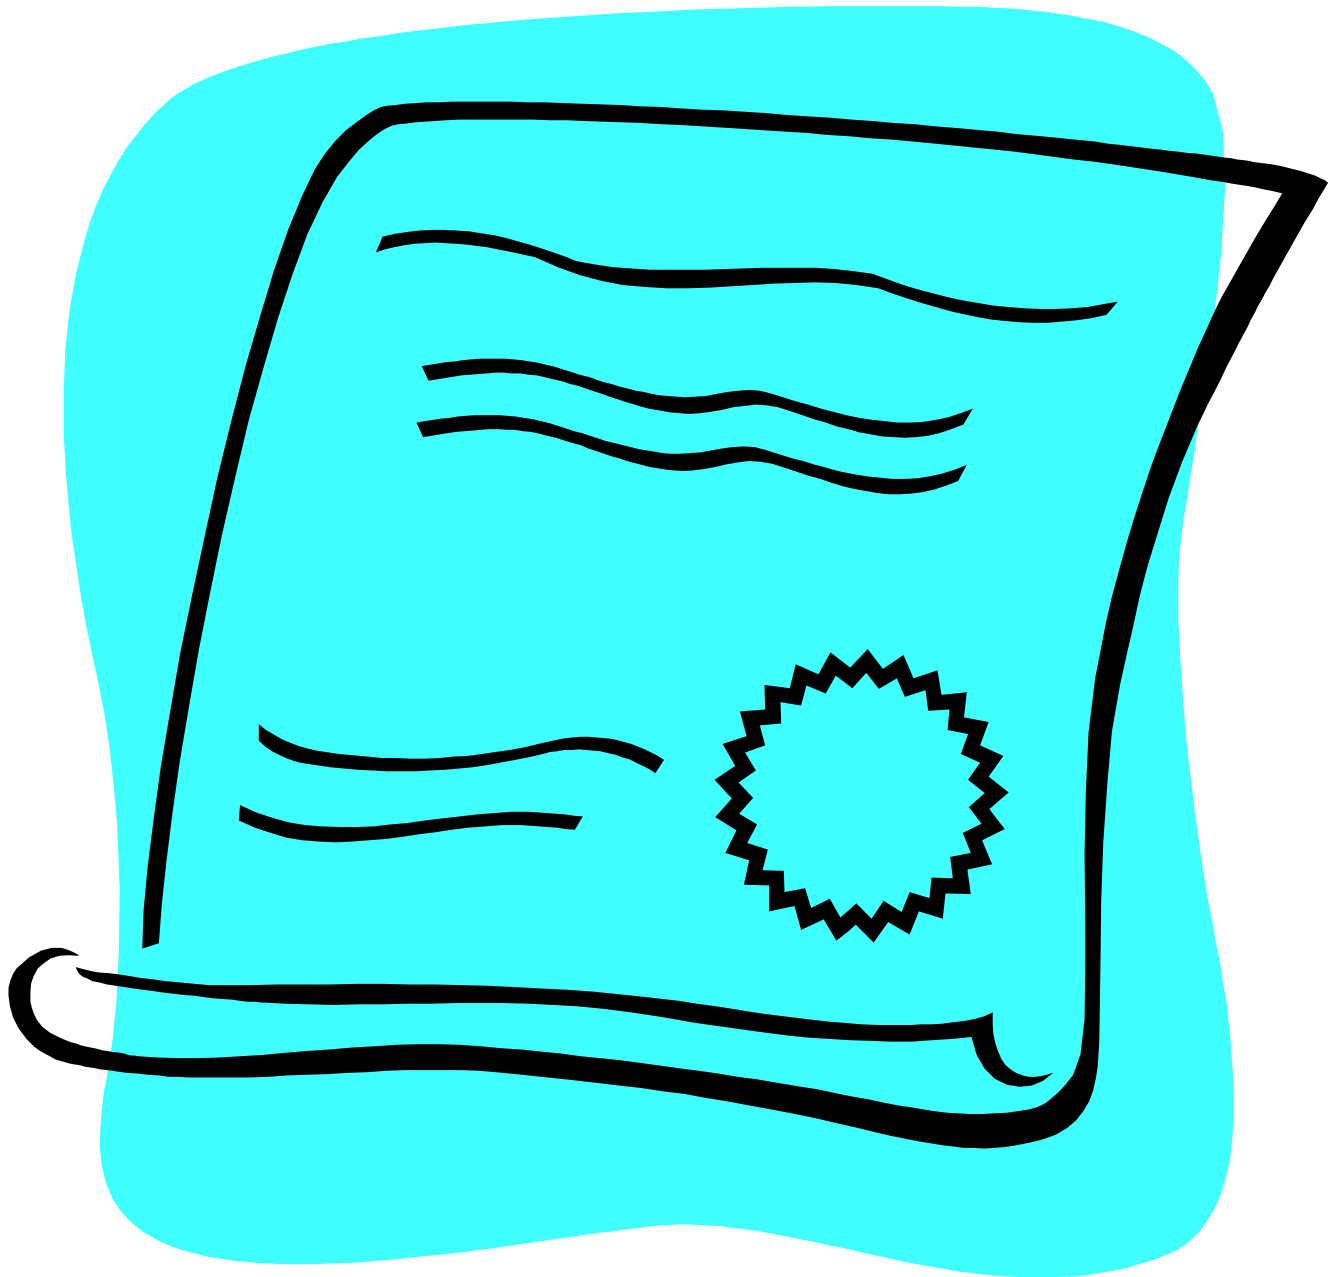

PLEASE NOTE:

In the case of repaired items, only the repair carried out is covered by the warranty, not the complete unit.

Certificate of conformity

You will only receive a certificate of conformity here if you requested one at the point of order.

No matter where you are, Parker will tell you where you stand on contamination.

Trust Parker to provide the benchmark for quality when it comes to portable particle counters. With heritage dating back more than a decade, no-one can match the proven accuracy of our instant, truly portable system condition monitoring.

Our latest model, the LaserCM, combines leading edge technology from the hydraulic, electronic and laser industries to provide you with unbeatable accuracy and repeatability. There's an early warning tool to prevent catastrophic failure in critical systems – but there isn't a lab in sight!

When it comes to filtration, trust Parker to be ahead of the game.

To stay one step ahead in filtration, call Parker on 00800 2727 5374 or visit www.parker.com/cmc

Notes Page

[illegible]

Parker Hannifin Corporation

Aerospace Group

A leader in the development, design, manufacture and service of control systems and components for aerospace and related high technology markets, achieving profitable growth through premier customer service.

Climate & Industrial Controls Group

Designs, manufactures and markets system control and fluid handling components and systems to refrigeration, air conditioning and industrial customers worldwide.

Fluid Connectors Group

Designs, manufactures and markets rigid and flexible connectors and associated products used in pneumatic and fluid systems.

Instrumentation Group

A global leader in the design, manufacture and distribution of high quality critical flow components for worldwide process instrumentation, ultra high purity, medical and analytical applications.

Automation Group

A leading supplier of pneumatic and electro-mechanical components and systems to automation customers worldwide.

Filtration Group

Designs, manufactures and markets quality filtration and clarification products, providing customers with the best value, quality technical support and global availability.

Hydraulics Group

Designs, produces and markets a full spectrum of hydraulic components and systems to builders and users of industrial and mobile machinery and equipment.

Seal Group

Designs, manufactures and distributes industrial and commercial sealing devices and related products by providing superior quality and total customer satisfaction.

The Choice is Perfectly Clear
